

# EFL Global Sustainability

## About EFL Global

EFL Global strives to be recognized as one of the leading sustainable organizations in the logistics industry.

Sustainable development in logistics calls for activities that lead to the highest economic and social gains while reducing the negative environmental losses. The collective actions of the Global Community working in tandem to build a better world have the potential to offset the detrimental impact of industrial and commercial activity.

EFL Global as an organization spanning all continents has embedded sustainable designs into our business models to build value chains that care about all stake holders while achieving economic growth.

We value strengthening partnerships through sustainability.
