

# EFL Global

## Multi-Country Consolidation in Central America

EFL Global operates a Multi-Country Consolidation model Central America, integrating cargo from multiple regional origins into one coordinated export flow.

The model improves container utilization, strengthens purchase order control, and provides visibility from cargo receipt through international dispatch. From strategically positioned hubs with access to efficient ports, EFL routes exports to North America, Asia and Europe, reducing complexity and improving shipment predictability.

### Capabilities

- Receipt and inland coordination of multi-origin cargo to the hub
- FCL consolidation from multiple plants and vendors
- Purchase order segregation with unit-level scanning and traceability
- Scheduling aligned with production cycles
- Integration with client's internal systems
- Coordinated export with full cargo control throughout the process

### Key Benefits

- Optimized container utilization
- Reduction of fragmented shipments
- Simplified regional logistics management
- Greater visibility over cargo across export cycle
- Scalability without increased structural complexity
