

# EFL Global

## X-Ray Cargo Screening

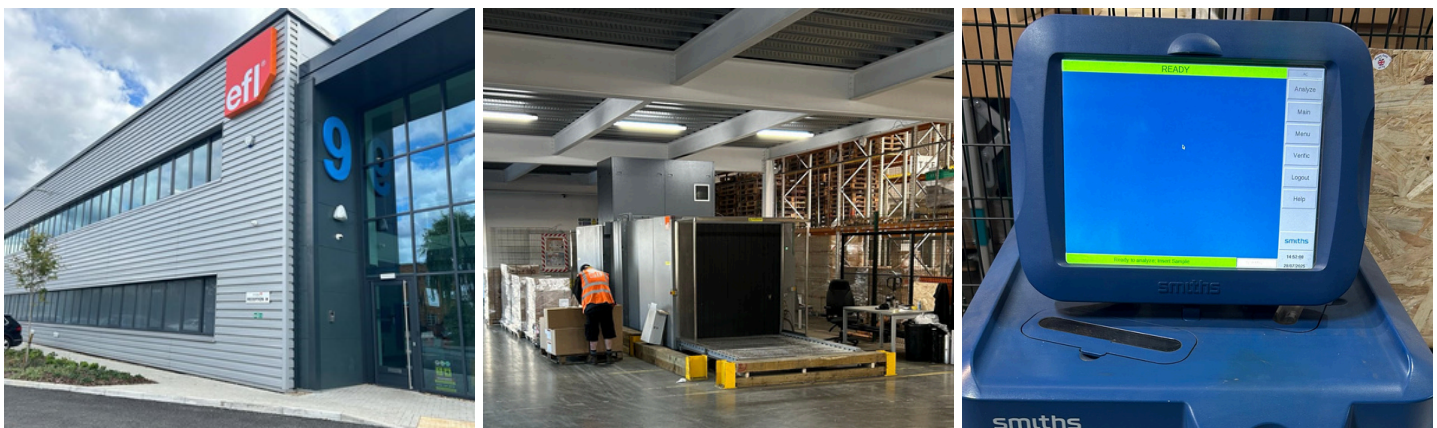

### Certified cargo screening is now available at our UK facility.

EFL Global's UK facility provides in-house X-ray cargo screening for export shipments requiring aviation security clearance prior to airline acceptance.

Screening is conducted in accordance with UK aviation security regulations under Civil Aviation Authority (CAA) oversight and aligned with international aviation security standards.

Operating 24/7, our on-site capability reduces third-party handling, shortens transfer time, and maintains cargo integrity through to airline handover.

#### Key Features and Capabilities

- CAA-regulated X-ray screening operation
- Primary / Secondary screening and FREDDs (by appointment)
- High-throughput X-ray equipment
- AOG priority handling with fast turnaround – cargo screened and ready for courier handover within ~30 minutes of arrival
- No third-party screening transfers
- Airline transfer to cargo terminals
- AWB documentation checks
- Cargo labelling services
- Live booking visibility tool
- DFT-certified, regulated screening staff

#### Service Options

- Screen Only – Screened cargo returned to customer or nominated haulier
- Screen & Transfer – Screened cargo delivered to airline cargo terminal
- Collection to Airline – Collection, AWB check, labelling, screening, secure airline transfer

#### Regulatory Oversight

Aviation X-ray screening is conducted in accordance with UK CAA requirements and aligned with international aviation security standards established by ICAO, TSA, and applicable EU regulations.
